Yeah, oh oh oh oh oh  
Zack Knight

Yeah yeah  
Wait up, wait a minute, what you got  
What you got, what you got, what you got for me?  
I won't lie, I can feel it  
Just say the word, say the word and we can move  
Now you're here, maybe we can kick back in the VI  
yeah  
We can hit that  
And when you're done, we can ride out  
We can get down with the light down

Pre Chorus:  
I got my finger on the trigger, I'ma go get her  
I'ma take you out for dinner,  
And I can show you, what a gentleman I am, oh yeah  
That's when I saw a future me and you together  
Living it up like we're supposed to  
That's when I realized that being with you

Chorus:  
It's just like be in first place in a race  
It's just like, when everybody screaming your name  
It's just like the feeling that you get on your birthday  
Being with you, it feels like woah!  
It feels like woah!  
It feels like woah! woah! woah!  
Like that, like that, like that, like that

Right here it's where it's at  
From the front to the back yeah I like that  
Tell your friends to stay cool  
I ain't your stereotypical fool  
I'll make it last girl forever  
You and I we should be together  
And when we're done, we can ride out  
We can get down with the lights out

[Pre Chorus:]

[Chorus:]

We can do it like the movies  
We can do it in 3D  
'Cause sometimes it feels like this  
Is all make believe

'Cause at the end of the day  
It's not about the money and the fame  
It's all about being with you

It's just like be in first place in a race  
It's just like, when everybody screaming your name  
It's just like the feeling that you get on your birthday  
Being with you

Chorus:

It's just like be in first place in a race  
It's just like, when everybody screaming your name  
It's just like the feeling that you get on your birthday  
Being with you, it feels like woah!  
It feels like woah!  
It feels like woah! woah! woah!  
Like that, like that, like that, like that
