I'm working hard trying to imagine autumn leaves,  
Sun's going to set,  
Doesn't have to be sad,  
Why would we hold our breath if we knew it'd be bad?

Wind's coming through,  
You've gotta stand on your own two feet,  
Pick yourself up,  
Remember what you are doing here.

Everyone's gotta go,  
We wave our goodbyes,  
This doesn't have to be the last time,  
Keep your sights on the light.

Let me drift into the water cause the ocean surface is  
where I'm most comfortable,  
let me drift into the water.

Cause it's a free, free for all, after all (Repeats)
