"A Different Ship"

She's on another ship for heaven
Got her ticket there from Lucifer himself
Second engine failing
No one can be rescued
Vacuum God

She's on another trip that's pregnant with disaster
Anything worth drinking up there on the shelf
Falling then forever
One planet with no surface
Anything still solid til the molten core?

Up against terrible odds
Up against terrible odds

She's on another trip to heaven
Got her ticket there from Lucifer himself
Falling now forever
One planet with no surface
Anything still solid til the molten core?

Vacuum God

Up against terrible odds
Up against terrible odds...
