Walking through winter woods at night  
A starlit freezing sky  
With confidence and self control  
The absence of the night held my captive soul alive  
Felt free to choose...

As I wandered closer  
Towards the heart of the night  
A strange reflection calling from above  
Something gave me pictures, pictures in my mind  
Never seen before

[Bridge:]  
As a puppet drawn towards...  
... A captive mind, no free will  
Closer to an unknown place...  
... Atmospheric, intense light

[Chorus:]  
Waiting in silence  
Falling in deep trance [x2]

*The strange reflection whispered  
Out my name, an unknown voice  
Whisper in the trees and in the wind  
Heed the call, mysterious  
No control of mind  
Drawing closer  
Freezing sting in my body and my brain  
As I felt that I would  
Lose all my control  
I stopped and  
Took a deep big breath*

*Who am I to face in this night?*

[Bridge:]  
*As a puppet drawn towards...  
... A captive mind, no free will  
Closer to an unknown place...  
... Atmospheric, intense light*

*[Chorus:]  
Waiting in silence  
Falling in deep trance [x2]*

*Heed the call  
Of the enlightened conscious ones  
Time has ceased  
By the trance, you'll see the light*

*Purified light and sound unexplainable  
From the ship came lucid frightened ones  
"We came forth the seventh star  
Constellation far  
We've been here before"  
We watched this earth alive...  
... Breathing, dying  
A science experiment  
Bring the Sign, now bring it to  
The humankind to all  
"A prophecy of our reign"*

*[Bridge:]  
As a puppet drawn towards...  
... A captive mind, no free will  
Closer to an unknown place...  
... Atmospheric, intense light*

*[Chorus:]  
Waiting in silence  
Falling in deep trance [x2]*

*Heed the call  
Of the enlightened conscious ones  
Time has ceased  
By the trance, you'll see the light*

*"Bring the sign  
Now bring it onto  
The humankind to all!"*
