I saw the sky last night
I'd never felt so bright
I'd never felt so right not knowing anything

Down, down inside the earth
Some god is gonna burst
Into a sea of white, not being anything

You know what I think of you
Better than I do
You told me that you do and I swallow everything

I'd believe in anything
Just to feel some sting
But I can't believe in you so just get rid of me

I saw the sky near the black smoke when I was just a
young one
Lifted so high from a cushion of what, you were my
loved one
Down in the earth, we were covered in dirt with other
done ones
I'll see the sky near the black smoke when I am just a
gone one

I took a bite of the sun and shone to kingdom come
Where all my words begun not meaning anything
You and your diamond eye
Never saw so bright
Never felt so blind while seeing everything

I saw the sky near the black smoke when I was just a
young one
Lifted so high from a cushion of what, you were my
loved one
Down in the earth, we were covered in dirt with other
done ones
I'll see the sky near the black smoke when I am just a
gone one
