No more hesitation, finally face to face, can you see me?
This is a creation nothing can replace, if we want it
When we reach for love together, we will feel the magic
A chain reaction of passion, in our hearts a chemistry
Through the years of learning, one thing stays the same, and you know it
We never give up searching until we find a way, if we want it
Chorus:
When we reach for love together, we will feel the magic
A chain reaction of passion, in our hearts a chemistry
When we reach for love together, gonna feel the magic
A chain reaction of passion, in our hearts a chemistry
(Solo)
Something in the atmosphere is burning clear and stirring me tonight
No secrets stand between the dreams that you call yours and I call mine
(repeats 2x)
Now you bet your life, because you know when it's right
In a moment's notice, right before our eyes, can you see it?
Days of madness over, ready for surprise, are you ready?
(chorus)
