Sit now quiet
Edge of forbidden nerve
Concentrate focus
We are better
The mirror zombie
Spirit of the ego
You are as heavy as the air
It's nice to meet you
Wanna tell you
You don't exist

The earth is my witness
The earth is our witness
The earth is my witness
Sadartha

Seen it on my chest
Callous on my heart
It grew negligent
Know now, you're a vegetable
Sitting leper
Growing in and on me
Cut off, let free, amputate, surgery

Sadartha
Nature's mother
You are my friend
Until we meet again...
