Speeding through hell  
And the devil will snatch your soul  
I'm living your life I'll control  
Your face smashed against the wall

Starting the day with a drink  
And a fat white line  
They're pumping you up with drugs  
And fame and lies

Breathing in, breathing out  
I look through the dirt six feet underground  
Buried alive let me out  
I'll take my last breath, lost my heart then I'll die

Chemicals run through your eyes  
Saving you from going insane  
The more that you snort  
The more you fry your brain

Breathing in breathing out  
I look through the dirt six feet underground  
Buried alive let me out  
I'll take my last breath, lost my heart then I'll die

Breathing in breathing out  
I look through the dirt six feet underground  
Buried alive let me out  
I'll take my last breath, lost my heart then I'll die
