"Anger In You"

Visit "[Anger In You](#)" on MotoLyrics.com

touch the pain with your bare hands
tell me what it feels like
feel the anger grow inside
tell me what it looks like, baby
in your eyes now

been in hell, now coming back
tell me what it feels like
going to take you there with me
tell me what you feel now, baby
in your heart now

do you feel what I feel now?
its the pain that tells you how
you should fear what I've been through
when the anger is in you
do you feel what I feel now?
its the pain that tells you how
you should fear what I've been through
when the anger is in you
feel the way I feel right now
tell me what it feels like
see the way I see right now
tell me what it looks like
see the bodies in the fire
tell me what you're waiting
touch the way I touch right now
tell me what it feels like, baby
in your hand now

do you feel what I feel now?
its the pain that tells you how
you should fear what I've been through
when the anger is in you
do you feel what I feel now?
its the pain that tells you how
you should fear what I've been through
when the anger is in you
