

A Split Second "Breathe"

Visit "[Breathe](#)" on MotoLyrics.com

hey..whoa..lets slow down before we go
hey..whoa
your voice is getting louder now
and you just expect me to know how
it feels like we are driving in the fastest lane
and i cannot separate myself

chorus:
ive thought this through and
chosen the right way
but i know its not what you want me to say
im suffocating here and i dont know how
to tell you
i just need some time to breathe

i must now retreat to my last plan
to push and run
if i can

chorus

i just need some time to breathe

sometimes i see us going nowhere
and you dont care

just let me breathe
just let me breathe

chorus
