

A Split Second "Without You"

Visit "[Without You](#)" on MotoLyrics.com

isnt it weird how some times seem longer than they are
isnt it strange how things so close at times can be so
far away

all the stars are falling away
but lonsomely here i lay

it looks as if im here to stay
without you all the stars fall away

how much longer will it be until i see you again
how much harder will it hurt until it is the end

all the stars are falling away
but lonesomely here i lay
it looks as if im here to stay
without you all the stars fall away

all the stars are falling away
but lonesomely here i lay
it looks as if im here to stay
without you all the stars fall away

without you
without you
without you
without you
without you

all the stars are falling away
but lonesomely here i lay
it looks as if im here to stay
without you all the stars fall away

without you
