Take a look around  
Open your eyes can you stand what you see  
Without a doubt it is frightening to the bones

Use your voice as the weapon drop the words like  
bombs  
Open your ears hear the screams now it's time to act  
Use your hands to rebuild their hope

There won't be silence no more, silence no more  
Take a look around  
Without a doubt it is frightening to the bones

Kick against the bricks scream against the wall  
Join the fight  
Use your words and make it fall  
Down! Fall down!

Bang Bang shoot me down!  
Bang Bang shot you down!  
I'm fed up of living in the line of fire (x2)

Take a look around  
Your eyes are open now (x2)  
It depends on you and me  
No one can stop us right now

Use your voice as the weapon drop the words like  
bombs  
Open your ears hear the screams now it's time to act  
Use your hands to rebuild their hope

(There won't be silence no more) (x2)

Use your voice  
Use your word  
Like bombs! (?)
