And so you fell
Into the danger
And you're all alone tonight
Well you're surrounded by the hurting type
And you just don't care for the sight

Well we'll come runnin' to your side
We will protect you from your fright
All of us are on your side
We'll take them
We'll take them... down

Fight! Fight, fight, fight

You know you must be strong and hold your own
'Cause the power's on your side
The enemy will try to give you fear

But you never run nor hide

And we'll come runnin' to your side
We will protect you from your fright
All of us are on your side
We'll take them... down

Fight! Fight, fight, fight

[Instrumental]

And we'll come runnin' to your side
We will protect you from your fright
All of us are on your side
We'll take them
We'll take them... down

Fight! We'll take them down, fight
