

Abacabb "Infection"

Visit "[Infection](#)" on MotoLyrics.com

Nobody is saying it but everyone is thinking it.
Nobody is saying it but everyone is thinking that shit.
This camp might be everything but temporary.
The infection is coming to wipe out what is left.
We are a dying breed.
Humanity's reign over this world has fallen.
Seconds pass.
I am breathless but I can still run.
Numbers and technology will determine our fate.
Where will you be? Lay this land to waste.
Fear was never an option.
You're all that I have.
I'm everything you wish you could be.
So, get fucked.
So say your fucking prayers to whoever it is you believe
in.
Fear was never an option.
I'm the infection.
So where will you be?
Lay this land to waste.
I want to free you from your misery.
I'm everything you could be.
I'm everything you wish you could be.
Nobody is saying it but everyone is thinking it.
Nobody is saying it but everyone is thinking that shit.
Get fucked.
