Forward assault to the shining palaces
Torches held high and blazing weapons
Forbidden magic's called upon
Swarms of disciples bring victory
We will unite
United in victory

Striking at the heart
Crushing all the souls
Take all that is flesh

Glorified in war zones
The instinct to conquer
An overwhelming force
Consumes this dimension
We will unite
United in victory

Embraced by terror
A siege comes forth
The horns of demons

I can see the huntress in the wind
Before your death she whispers
Silent but invincible she rides
To inseminate prevalence

Gather as one to ensue conflict
Batter the bones of the angelic
Create destruction in Satan's name
Uncover the shadow to consume the earth
