It's been a while  
Since I've seen you laugh  
It's always just a smile  
Instead of tears

I know a place  
Where your shadow lives  
Lonely, aching in an endless dark...

Gone with the wind  
Away in a cloud  
Gone is my heart  
When it feels your grief

The endless books

That describe the end  
Or what it was before  
And what will be

Well I know a place  
Where all shadows live  
A place where you and I will someday meet...

The ones that exist  
Will not cease to exist  
And Light will prevail  
Just believe no one's gone...
