Wanted by the sun  
And wanted by the moon  
There's plenty of warmth on sun  
It's more than you can stand  
More than you can stand...

And moon is hardly known  
As most of us I think  
They say it's cold and lacking air  
But we can't see it all  
We can't see it all...

Sing with me and dance with me  
Cause I'm not quite sure  
The moon seems far and on the sun  
I cannot put my dreams...

Wanted by the light and wanted by the dark

Light gives life and gives support  
But dark gives dreams, yeah, dark gives love  
And both of them give questions...

Sing with me and dance with me  
Cause I'm not quite sure  
The moon seems far and on the sun  
I cannot put my dreams...  
Cause my dreams are made of light and dark  
And I wish the 4 of them  
To be there, charming, cause I'll maybe  
Sometimes want to take small trips...
