"Funeral Feast"

Let it long way through destiny,
Through sky on the earth
Shaft of moonlight in the star space
Is born by the legend about boundless space
About death of slave warrior.
Your love goes far away with you,
She separates eternal dream with you
Your domain we divide into three parts,
We place you to worthy funeral feast.
Night after night, day after day, go away
Eternal moon way is night-silence,
Love of stars is prophecy-of eternity
The soul of warrior is immortal-in all centuries.
Initial spark in the funeral fire
Release soul from flesh & misery & life
Bright light of love follows him
And sun & sky follow him.
