It's all forgotten  
A page in time  
Your understanding  
Of those who died  
You need to listen  
You need to try  
To understand this  
And rectify

Nowhere to run  
Nowhere to hide  
Little stranger  
You have nothing more to save you from your life  
You came undone  
Little savior  
And you can't save the souls of those who recognize

There's no forgiveness  
No piece of mind  
Just loaded questions  
You'll redefine  
You need to listen  
You need to try  
To understand this  
And redesign

I'll lead this fight, I know just what to say -- whoa  
Yeah we've had enough, your lies won't work today --  
whoa

Nowhere to run  
Nowhere to hide  
Little stranger  
You have nothing more to save you from your life  
You came undone  
Little savior  
And you can't save the souls of those who recognize

Little Stranger
