"The Dark Horse"

Visit "[The Dark Horse](#)" on MotoLyrics.com

To sail across
This vessel wasted
The breath of life
Becomes a virus unto all

[Chorus]
Carried away through the shell of the earth
Here we lay shattered burnt and disposed
Heavenly fires rain from within
Primordial cycle starts again

The elements of mother earth are gone
Taken our souls along the way (it's hard to breathe)
It kills to see the life that we once had on the inside
Gone on to the light my eyes project

[Chorus]

Corrosive the time collapses (distant)
Black herds of fear caress the eye (shallow)
Familiar dark horse lives inside us (closely)
Stampede it's way across the earth
