I listen to your wicked life, lived on your promises
This what I would feel no one else just beside of me
I thought like I was to you made me a stranger
Can I find the way again to win you back
Can't let you go

Train to nowhere, riding on a train to nowhere
We're in a train to nowhere
Can we take the chance to escape?
Train to nowhere. Can we leave the train to nowhere?
We're in a train to nowhere
Can we take the chance to escape from nowhere?
Train to nowhere

It's nothing left to talk about. Can I believe you?
There's still a lot of secrets left and so many doubts
You couldn't feel the same of flame
It's left like good memories
Either with or without you I will make my way
Feelings are lost
