Don't do it baby,
Fall out the door
I know the feeling
Been there before
It gets inside you
Won't let you go
Don't fight the feeling
Just let it flow
Now I've been high a million times
I've been drunk a million more
Percocets and vicodins
I've got scripts for a dozen more
I've numbed my pain with fine cocaine
But there's something I can't ignore
You gotta believe me when I tell you that you make
me feel something I've never felt before

Seems so far to get to you, man
A thousand miles away
Seems so far to get to you, man
A thousand miles away
I climbed so hard to get to you, man
A thousand miles away
I climbed so hard to get to you, girl
A thousand miles away
Will the sun shine down upon us, baby
You fell so far that I couldn't reach you
I laughed so hard I died
You see? you're low.
You've seen much, too much, baby
