Somethin' in the air's got it's claws in me  
A little bit dirty and a little bit clean  
Thumpin' on my drum like a boy in heat  
Scorin' like a rock star with a country beat  
Somethin' in the beat's got it's claws in me  
A little bit crazy and a little more free  
Strummin' on my guitar with a nasty sound  
Baby I can't help it, I just gotta get down

It's what you still remember  
No need to flash a temper  
Don't have to question why when  
Country rocks and country rolls but

I'm not your worst offender  
I'm not your great pretender  
Don't have to tell me why just  
Feel it in your soul

Dirty country – Dirty looks and dirty beats for  
Dirty country – Dirty music, dirty deeds  
Dirty country – Somethin' like you've heard before  
so  
Rock your country – I've got what you need

Somethin' in the song's got it's claws in me  
A little bit richer, and a little bit cheap  
Flyin' on my fiddle in a blaze of light  
Don't care what they're sayin' cuz I'm feeling  
alright

It's what you still remember  
No need to flash a temper  
Don't have to question why when  
Country rocks and country rolls but

I'm not your worst offender  
I'm not your great pretender  
Don't have to tell me why just  
Feel it in your soul

Dirty country – Dirty looks and dirty beats for

Dirty country Â– Dirty music, dirty deeds  
Dirty country Â– Somethin' like you've heard before  
so  
Rock your country Â– I've got what you need

It's what you still remember  
No need to flash a temper  
Don't have to question why when  
Country rocks and country rolls but

I'm not your worst offender  
I'm not your great pretender  
Don't have to tell me why just  
Feel it in your soul

Dirty country Â– Dirty looks and dirty beats  
Dirty country Â– Dirty music, dirty deeds  
Dirty country Â– Somethin' like you've heard before  
Rock your country Â– I've got what you need

Dirty country Â– Dirty looks and dirty beats for  
Dirty country Â– Dirty music, dirty deeds  
Dirty country Â– Somethin' like you've heard before  
Rock your country Â– I've got what you need
