"Forever Your Angel"

Visit "[Forever Your Angel](#)" on MotoLyrics.com

And when you feel the wind blow by
Like someone's brushing by your side
You'll turn around and no one's there - but baby
Remember now the love we shared
So will you understand my love
If simple words don't come out right
And could you struggle past the tears - the sadness
And let me try to shed some light - in your life

When sadness blinds what you can be
I can't expect you to see me
So baby listen to your heart - just listen
Cuz that's where I will set you free - to leave me

And when you think that you're alone - Oh baby
And dial my number on the phone - to find me
And though my voice you may not hear - I promise
I'll wipe away your every tear - And baby

Our summer love that was so new - remember
And when I held your heart so true - so tender
And though you may not feel my touch - just know
that
I'm always watching over you, I'm watching

I'll wait for you for as long as I can
Please know that someone will understand
And if you need me just open your eyes
And when you're blue, you can look to the sky

Your world was changed when I left you behind
Though it was right we just ran out of time
But when you're sad, remember this:
I'm always your angel

At night I see you in your bed
I hear the thoughts inside your head
I hear you crying in your sleep - so lonely
And see the secrets that you keep - inside you

Whenever you can't see the light
I'll spread my wings and hold you tight

And when you don't know where you are -
You don't know
I'll keep you safe among the stars - so let's go

And when you feel the wind blow by - and find you
Like someone's brushing by your side - remind you
You'll turn around and no one's there - but baby
Remember that the love we shared was Heaven

Come fly away and stay for a while
I'll hold you close 'til you give me a smile
Rest in my arms and know that I am
Forever your angel

What happens now and what happened then
Will all disappear when I hold you again
But 'til that day I'll watch over you
Forever your angel

I'm always your angel - Forever I'm watching you
closely
I'm always your angel - To make sure you'll never
be lonely
Forever and always - Just know that I will protect you
Forever your angel - Oh girl, I'll always be with you

When you feel the wind blow by - and find you now
Like someone's brushing by your side - remind you
how
You'll turn around and no one's there - but baby
then
Remember that the love we shared was Heaven-sent

Forever I'll watch over you - enfold you there
Forever my love will be true - and hold you yeah
And though I'm not there where you are - forgive me
please
Just know that I will not be far - if you need...
What happens now and what happened then
Will all disappear when I hold you again
But 'til that day I'll watch over you
Forever your angel
And when you think that you're alone - Oh baby how
And dial my number on the phone - to find me now
And though my voice you may not hear - I promise
you
I'll wipe away your every tear - and kiss you too

Our summer love that was so new - remember this
And when I held your heart so true - with tenderness
And when you feel that you don't know just where to

go

Iâ€™ll be the song thatâ€™s playinâ€™ on the radio
