I hear you in the darkness, I hear you in the night  
I see you on your marches, I see you when you fight  
I can feel your heartbeat, I can feel your pain

I'm the earth and the sky, shadow and light  
The wind and the rain and the fire that burns in your  
heart  
I am space, I am time, all the stars that shine  
The sun and the moon, the perpetual circle of life  
You're not alone, you're not alone

I can feel your anger, I can feel your hate  
I see how much you suffer, I see you are afraid

I'm the earth and the sky, shadow and light  
The wind and the rain and the fire that burns in your  
heart  
I am space, I am time, all the stars that shine  
The sun and the moon, the perpetual circle of life  
I'm the earth and the sky, shadow and light  
The wind and the rain and the fire that burns in your  
heart  
I am space, I am time, all the stars that shine  
The sun and the moon, the perpetual circle of life  
You're not alone, you're not alone
