"I Am The Night"

Visit "[I Am The Night](#)" on MotoLyrics.com

I am the lightning
And the storm
All hell broke loose
On the night I was born
A child of fire
And burning flames
Look to the east
And you'll see hence I came

Might throw you into the darkness
Or save you by the light
Of the moon and stars
Ever shining
Celestial bodies burning bright
Burning bright

I, I am the night
I, I am the night

I am the terror
The beast at large
Heed my warning
Sound the alarm
An endless shadow
For daylight you pray
Lock your doors
But you cannot get away

Tender angels of mercy
How they run from my sight
Eclipsed into darkness
Searching only for the light
For the light
For the light

I, I am the night
I, I am the night
