Little flower don't you wither  
I brought some water so please will you drink now  
Little flower don't close your eyes  
I'll lead you through this night if you only trust me

Little flower do you really know me?  
Words have been distorted, did they ask for my  
opinion?  
Little flower don't close your eyes  
Hiddens weed have grown between us  
though I see you through the nest

I'd like to take you with me  
Replant you in my garden, ooh  
I know that you would like it there  
So please do not refuse me, oooh!

Little flower in the forest  
You bring more pleasure than most of your sisters in a  
vase  
Little flower don't shut your ears, oh no  
I whisper your name, hear me out  
I'd like to take you with me
