I know what soothes me
I know what moves me
I feel it when you're near
Any suggestion
You care to mention
Shows me your love affair
Is alive
And still growing yeah
Tell me you miss me
Just want to kiss me
See how it's hard to stop
Thinking about us
Homehow we might just
Make up for what we've lost
We survived
And are growing
And the chances are
We can still go far
For this joy
The best is now here
You are for me

Ahhhhh....

Some things were always meant to be

You are for me

Ahhhhh....

Soon we can live our fantasies

So much emotion

So much devotion

Baby there's just no way

You cannot see that

What we've achieved can

Take us a long, long way

Now it's real

What a feeling yeah

You are for me
