All the channels are all down
in everyone
Like a sky without a sun
it can't go on

Everyone can come around
to your sermon underground

In the fire I'll be down
to your sermon underground

All the people look so strange
who know your name
where the lonely will betray
They lost their way

Everyone can come around
to your sermon underground

In the fire I'll be down
In the fire I'll be down
to your sermon underground

Everyone can come around
to your sermon underground

In the fire I'll be down
In the fire I'll be down
to your sermon underground

Everyone can come around
In the fire I'll be down
(4x)

Everyone can come around
