"Never Question Reason"

Visit "[Never Question Reason](#)" on MotoLyrics.com

i called the earth today and she was sighing she
always seems to complain i think shes lying seems like
the end today chorus: bright colors shine from far
above illuminating you but they dont seem to be far
enough healing all the pain i called the world today
cant you keep trying you always seem to live so
straight you will be dying seems like end arrived
chorus: ... all so far away dont know what to say never
question reason just waiting for the seasons all for one
in vain just never stop complain all so far away
