

Papoose "Drop It"

Visit "[Drop It](#)" on MotoLyrics.com

(feat. Busta Rhymes)

[Chorus - Papoose]

Gun to mind

Mind to gun

Define which one is the surviving one

You say to mind your means is surviving

Define it son

Rappers use their mind

Since the mind behind the gun

The mind refines the dumb

Guarding them for time to come

Drop it son

Gun to mind

Mind to gun

Define which one is the surviving one

You say guns is your means to surviving

Define it son

Where you get your power from when drama comes?

Behind the gun

Power is money

Money is power

Drop it son

[Verse 1 - Papoose]

Mind over matter

You need common sense

So you can analyze and study current events

Politics got me sick to my stomach

I'm feeling nausea

can't go to Atlantic City to get my dollars up

The casino's shut down from the bottom up

lost a lot of money out there

Feel like they robbing us

The governor he a billionaire

He got a lot of bucks

guess all the money he made is just not enough

Suicidal bombers in and out of la gradia

Governor Cozine scared of the mafia

His way or the high way, no hesitation
It's about to be a political assassination
And they say the terrorists had plans to blow the
Holland up
Push the water into the Manhattan to flood the island up
They say it can't happen
Man they always lie to us
The Hudson River got enough water to fucken swallow
us

[Chorus - Papoose]

[Verse 2 - Busta Rhymes]

Pap, you so right when you say the mind refines the
dumb
With the powerful jewel I drop they wonder where my
knowledge from
So I tell them I possess the power of an army
Numb the oppression, all the aggression
Combine it as one with science that awakes them when
they sleep and re-forces them to replay it
As it gets deeper they'll probably kill me when I try to
say it
Because of the power I possess already
shit is funny
The say I'm more potentially dangerous when I get
money
Never hesitate to kill a devil or superstition
But the random orange alerts that scare you into
submission
I give your proper understanding, just acknowledge the
wisdom
There's still the fear of god and the fear of terrorism
But no matter the circumstances I'll be the one first to
get the iron
Command my respect and survive me the worst shit
While I share another perspective
