La da da daaa da(hummmming)

Look at us now and what we have done,
we have found the perfect match and we will soon be
one

Our life is just before us and the is script still unclear
But I know this for sure, I am complete with you here

Give me your love and I will cherish you always,
And I know that our love will last for ever and a day

I have dreamed of the day, when love would be true
And I have found that place, and I have found it with
you

So now take my hand and we will go see baby
All this life shows us and all that we will be
--

Give me your love and --I --will-- cherish you always,
And I know that our love will last for ever and a day

Love has come to me---- and love has set me free
love has brought us joy love comes from you --

Give me your love and --I will-- cherish you always,
And I know that our love will last for ever and a day

Love has come to me---- and love has set me free
love has brought us joy and love comes from you --

Give me your love and-- I will-- cherish you always,
And I know that our love will last for ever and a day

Give it to me
Give me your love, Give me your love- come on and
give it to me (repeat)
(I need your love)
