This reprisal search for words  
Analyse what it's worth  
Set the stars ablaze from earth  
In thoughts sublime we immerse

Another fear I can't see  
All blown away

You say you'll never run away  
From a certain pointing light

Beneath black skies I search for words  
Hell relies on what is worse  
Heaven lies on sullen earth  
Fall then rise  
Fall then birth

Another fear I can't see  
All blown away

You say you'll never run away  
From a certain point in life

Is there something wrong?  
Nothing I sense no belong
