I've been away now, I've been away from you  
I'd like to stay now, I'd love to stay with you  
So let me in, it's a chilly world outside  
And conversation's a silly goal tonight  
So just hush

And do the cake walk, don't want to talk  
Cuz words are overrated anyway  
I know you, I know by now

There's nothing new to say now anyhow  
Say now anyhow

It's been a while now, it's been a while for me  
To see you smile now, to see you smile at me

Under covers, and under stars I'm here with you  
We can make our winter warm inside this room
