"Sub-particle entanglement theorem.  
I am half of us.  
And in the moments where we don't exist,  
I am reminded of the saddest fact.  
That once entangled  
there is never any going back.  
Once connected we are always and forever one.  
Not withstanding things we have not done."

I miss you so.  
You speak to me  
nothing like that.  
Here where we come from,  
What is there to be said?  
What are we to do?

I know we are gonna get it.  
I know we are gonna get away.  
What was it for, and why did we lose it?

You can hide in the shadows.  
I won't go feeling that I mattered to someone.

I miss you so.  
You speak to me  
nothing like that.  
Here where we come from,  
what is there to be said?  
What are we to do?

I know, we are gonna get it.  
I know, we are gonna get away.

You can hide in the shadows.  
I won't go feeling that I mattered to someone.

Some words will change you.  
What you get.  
What you give.

Arrow and bow, on your window.

Some words will change you.  
What you get.  
What you give.

I know, we are gonna get it.  
I know, we are gonna get away.

Some words will change you.  
What you get.  
What you give.

Arrow and bow, on your window.

Some words will change you.  
What you get,  
What you give.

I know, we are gonna get it.  
I know, we are gonna get away.

Arrow and bow, on your window.
