

Apparition

"End Of A World"

Visit "[End Of A World](#)" on MotoLyrics.com

Till death do us part
& until the moon and sun collide
Calm our burdens, our heavy hearts
& let us reach for what we feel and never let go

Take my hand now, this world is falling apart
The sky's falling, the ocean tears down our walls

For every star there's a dream...
For every dream there's a chance I'll see your face
again
That the time we spent together will last forever...
Tell me that there's a chance

Take my hand now, this world is falling apart
The sky's falling, the ocean tears down our walls
