"Eraser"

Visit "[Eraser](#)" on MotoLyrics.com

New identity, relocation
I'll take you through it step by step
You're in an extremely high risk situation
That should have been explained to you

I work alone! You know that!
I work alone! It's just a fact!
You should have known when you wore the tap!
You should have known there's no going back!

Get Down! Oh Shit! Close your eyes! Shut up!
Don't move! You're dead! You've been! Erased!
You'll never see me again
But I'll know every move you make!

Now your life is not your own
You found out and it's too late!
You're erased!

Use your heads, lie low
And I promise, no one will hurt you
But if you try to skip out on your testimony
I'll deliver you myself!

It's gone too far! We're on our own!
It's gone too far! Your cover is blown!
They know where you are! Location is known!
They know where you are! And your not alone!

(Chorus)
