Stranger next to me, have I seen your face
Stranger next to me, have I seen this place
Oh stranger you're so close I can hold your hand
I'm a stranger oh just like you don't you understand
Oh stranger

Silence stopped the time I can hear your heart
Glimmer of your eyes reach me from the dark
I'm dreaming or may be not clothing's falling down
All matters we're giving up
Cause nothing matters now
Oh stranger

Between the walls and face to face. Oh stranger
We won't have another chance. Oh stranger
There won't be another night
Oh stranger With me tonight
You're stranger With me all night
My stranger

Flowers on the floor, all around your hair
Morning at the door, I don't think you care
You whisper in my ear, shiver in my arms
Don't let it stop, don't go away
Screaming in your eyes
Oh stranger
