No comfort! x4

Fear with the face of the unknown  
Born to die in a lonely world  
Hostility breeds within the void  
Left by the loss of understanding

Hatred the true face of ignorance  
Forced fed to the masses with the promise of salvation  
Knowledge controlled, power withheld  
In the name of one, let all blood spill

There is no god  
That could love this world

I find no comfort  
In a life lived on my knees  
No comfort  
To find just what I could never believe  
No comfort x3  
I could never believe

To live a life without regret  
Is it not enough  
To love and to be loved  
Nothing last forever x2

Nothing last!  
Superstition rules  
In the land of the weak  
Nothing last forever  
Superstition rules  
In the land of the weak

Fear with the face of the unknown  
Born to die in a lonely world  
Hostility breeds within the void  
Left by the loss of understanding

Hatred the true face of ignorance  
Forced fed to the masses with the promise of salvation

Knowledge controlled, power withheld  
In the name of one, let all blood spill

There is no god  
There is no god  
That could love this world

There is no god x6  
That could love this world  
That could love this world

I find no comfort  
No comfort  
No comfort

I find no comfort  
No comfort  
No comfort

I find no comfort  
No comfort  
No comfort
