When you come back, please come back home as heroes
And while you're gone, we'll sing this song for you
And we will share the pain and share the glory
So come back home as heroes
And make us heroes, too.

When you come back, come back as heroes.

Can you feel the energy?
United voices fill the streets
And together we are million strong
So when the moment comes to shine
I hope some dreams are by your side
Let them lift you up and drive you on.

When you come back, please come back home as heroes
And while you're gone, we'll sing this song for you
And we will share the pain and share the glory
So come back home as heroes
And make us heroes, too.

When you come back, come back as heroes.
When you come back, come back as heroes.

As a mission hold its breath
Just make us proud and be the best
We'll take the lows
And we'll chill the highs
'Cause there won't be a sweeter sound
In every village, every town
We'll be singing, when you lift the final cry.

So go on, and on and on ...

When you come back, please come back home as heroes
And while you're gone, we'll sing this song for you

And we will share the pain and share the glory
So come back home as heroes
And make us heroes, too.

When you come back, come back as heroes.
When you come back, come back as heroes.

When you come back, please come back home as heroes
And while you're gone, we'll sing this song for you
And we will share the pain and share the glory
So come back home as heroes
And make us heroes, too.

When you come back, please come back home as heroes
And while you're gone, we'll sing this song for you
And we will share the pain and share the glory
So come back home as heroes
And make us heroes, too.
