

Atomic Aggressor "Twilight Spectres"

Visit "[Twilight Spectres](#)" on MotoLyrics.com

Sometimes I seen them, in our world
Or looking us so cautiously through our dreams
Seen like they think the human kind are all the same
Maybe they don't know the human minds are different

Along the time I've realized about some details
Somethings that will allow me to visit their world
The visitors of human dreams I see in my mind
The only one who they can't see, It's me

Throught my dreams I will intent across that gates
The limits between the earth and twilight zone
The place from where arrive those spectral lives
The jouney starts, the fear comes, I fell

I'm entering into a dream a fantasy

The things I see I can't explain, It's all abstract

Spectral forms silent sounds

I see them exploring all the human minds
I can't move, I can't escape,
If they know that's I'm here soon I will die

They take the human souls through their own spaces
To make with them some fright full and strange rites
Now O fell something is happening
Seem like those spectres are looking at me

Spectral forms silent sounds,
I see them exploring all the human minds
I can't move, I can't escape,
They saw me here and now I'm damned too.
