No more tripping down the hull
It seems love's back just hit our wall
At times I'm full of spite
But something's strong inside
It says nothings wrong, you're doing fine
Doing fine

We're through it
And get back to it
We're through it now
It took a real situation to make me feel alive
We're through it now

All this running just to fall
It seems my run has slowed to crawl
Feels like nothings right
Something screams inside
Won't be long, you're doing fine
Doing fine

We're through it
And get back to it
We're through it now
It took a real situation to make me feel alive
We're through it now

Staring out the window fall you have to pass the time
Taking all the light that shines through hold it in my
mind

I'm doing fine

We're through it
And get back to it
We're through it now
It took a real situation to make me feel alive
We're through it now
