Baby, turn around
And look her in the eye
And if you think your life is still worth saving
Let her go

Tonight, you know shes gonna cry
And you know your sick and tired of always caving

Baby, you dont want to live your fathers life
Lately, I can see the struggle in your eyes
Oh baby, your still holding up and you'll survive it
tonight
Turn around

Baby, turn around
And let the wind be at your back
Blow away the guilt that makes you hold her
Just listen to that angel on your shoulder

Baby, you dont want to live your fathers life
Lately, I can see the struggle in your eyes
Oh baby, your still holding up and you'll survive it
tonight
Turn around
Turn around

Baby, turn around
And look her in the eye
And if you think your life is still worth saving
Let her go

Baby, you dont want to live your fathers life
Lately, I can see the struggle in your eyes
Oh baby, your still holding up and you'll survive it
tonight
Turn around
You turn around
Baby turn around
