I'm just sitting watching cars go by
Sure I could join them, but I'll let them all go by
' Cause I have tried, but I can't do what you do
There's nothing wrong with me
Maybe there's something wrong with you

Yeah I went dragging my smile all over town
Trying to get me somewhere, only got me down
' Cause I have tried, but I can't do what you do
There's nothing wrong with me
Maybe there's something wrong with you

Well your gold it glittered and your gold it shone
It might have caught my eye, but it didn't turn me on
' Cause I have tried, but I can't do what you do
There's nothing wrong with me
Maybe there's something wrong with you
