You can't say this at home
Who watches from the sky
It's over on the interstate
Your left making shadows
Standing in the floodlights
Mute reflections try to imitate

Sound free
Hands off society

Just laugh and make your mark
Trapped in your best intentions
And blinded by the cause

It's a self-fulfilling motive
Seen through the softest eyes
Embedded in the common law

CHORUS

Evils and insurrections
Inject into our minds
Raise your hand without an arm
Easier to offend you
Than to hold my breath for days
Dissents designed to keep you warm

CHORUS
