She's a young girl talking about herself
(You can't stop her)
She's a young girl talking about herself
(She keeps on talking)

She's gonna break your heart
And tell the world about it
She's gonna break your heart

I was like, she was all, he was all, they were like, we
were all
like oh my god, like, totally, we were like, I was all, they
were

all, he was like, she was like, oh totally, like oh my god
(x3)

Young girl talking about herself
(talking about herself)
Young girl talking about herself
(she's a young girl talking about herself, about herself)
