Let the good times in
The leaves of life are falling down around you, girl

Nothin's so bad that it can't be a-changin'
Start rearrangin' life on a shelf
Nothing but sadness and out of the fun
Cause your having none alone by yourself

Look through the tears that's in your eyes, yeah,
Just throw off your troubles and leave them behind

Let the good times in
Let love shine through
You'll see how happy we can be together
Let the good times in
The leaves of life are falling down around you, girl

How does it feel with your feet in the water
Now is the time you want to get wet
What would you think if i told you i loved you?
Would you believe me? What would you do?

Let's ride a dream that's made for two, yeah
And just hop on a rainbow that's waitin' for you

Let the good times in
Let love shine through
You'll see how happy we can be together,
Let the good times in
The leaves of life are falling down around you, girl

REPEAT
