There was something in the air when you caught my eye  
There was something in the way that you never smiled  
Kinda serious, I feel it and wonder why  
Coz I know that you're not shy

I'm so sorry, I've heard all the stories, I know what they've told me  
Can't help it and I can't fight  
Now if only, I let you control me, let you get to know me  
Seems like I don't have a choice

You're just a Mind Controller  
Think that you're running the show  
You're just a Mind Controller  
Try it but I already know ...

You want a piece of me, but I've seen your kind before  
Heard the things you like to do when behind closed doors  
I'm not saying that I'm out, I'm not saying no  
Now you're giving me a taste of your Mind Control

Sorry, I've heard all the stories, I know what they've told me  
Can't help it and I can't fight  
Now if only, I let you control me, let you get to know me  
Seems like I don't have a choice

Gonna let you in my mind  
Can't fail to unless you try  
You can take the lead, you can control me on the things I can't decide  
Come on in but please be kind  
You can do what others tried, coz I got nothing to hide

You're just a Mind Controller  
Think that you're running the show  
You're just a Mind Controller  
Try it but I already know ...
