If we can't be like a story book
Pardon me, if I don't take a look
Don't wanna know
If we can't make the music blend
And let the song sing and know the end
Then I'll be moving down the road

It's a long way to Heaven
And I'm so tired of being alone
So think it over and just be sure
If we can make it last that long

If you can't look me in the eyes
And make me never wanna say goodbye
Then I can't see
Wasting all that precious time
If tomorrow is all we're going to find
Is I'm not the one you really need

It's a long way to Heaven
And I'm so tired of being alone
So think it over and just be sure
If we can make it last that long

Now I'd like to know if we can always sing a song
I'd like to know if this love is right or wrong

It's a long way to Heaven
And I'm so tired of being alone
So think it over and just be sure
We can make it last that long

It's a long way to heaven
And I'm so tired of being alone
