Control yourself, and you will be okay  
Control yourself, and you will be okay

Even polar bears, need warm hearts to make it through  
the snow  
Polar bears, need warm hearts to make it through the  
snow

And I am human too  
And I'm human enough to miss you

So equip yourself  
In essential wear for future trips to space  
In essential wear for future trips to space

Equip yourself in essential wear for future trips to  
space  
Like silver gloves and a visor and reflector for your  
face

And I might go without you  
But I'll be thinking about you  
And I am human too  
And I'm human enough to miss you

So equip yourself  
In essential wear for future trips to space  
In essential wear for future trips to space

Control myself and I will be okay I tell myself  
I will be okay I tell myself  
I will be okay  
I will be okay  
I will be okay I tell myself
